1 Litium Salt Drum 锂盐桶

该桶系本公司最新开发的，具有国际领先水平的专利产品。造型新颖、别致，用料精细考究且坚固耐用，为高纯度晶体化工原料的仓储运输包装开辟了一条新路。

This drum is the patent product launched by our company latest with achievement of international advanced level. It features novel and elegant design, and selected, solid and durable material as well, which delivers a new solution for the storage and transport of high purity crystal chemical material.

型号 TYPE	HT-60L	HT-120L
外型尺寸 EXTERNAL DIMENSION (mm)	Φ425×950	Φ545×1115

2 Electrolyte Drum 电解液桶

危险品货物包装容器及锂电池电解液不锈钢桶产品特点：

产品根据国际流行的桶型设计制造。具有美观高雅，整体结构合理，坚固耐用、卫生、安全、清洗罐装方便、耐腐蚀等特点。

适合出口危险货物及锂电池电解液、高纯度化工原料的储存及运输流通。

★桶体材料选用进口SUS304优质不锈板，封头经拉伸，提手及底圈经卷管与桶身焊接成型，造型设计合理，美观耐用。

★采用钨极氩弧气体保护焊（TIG），焊缝单面焊接双面成型，焊缝无氧化无气孔夹渣，更耐压，可承压0.6Mpa。

★桶内无卫生死角，出液管紧靠桶底，不存液。

★桶口采用凹凸式法兰密封，密封垫采用四氟乙烯材料，加液口采用国际通用的自封式（1/8"、1/4"、1/2"、3/4"）不锈钢标准快换接头，快换接头上部加装保护帽，确保密封和安全。

Features of packaging containers for dangerous cargos and stainless steel drums for lithium cell electrolyte:

On the basis of fashionable design across the world, our products are of attractive and elegant appearance, rational overall structure, solid and durable quality, hygiene, safety, convenient cleaning and filing, anti-corrosion, and so on.

Our products can be applied to the storage, transportation and circulation of dangerous export cargos, and lithium cell eletrolyte as well as high purity chemical material.

* selected import SUS304 high quality stainless steel for the drum body, stretched head, handle and foundation ring welded with drum body via pipe into form, are of sound design, attractive appearance and durability;
* adopt TIG welding, double-side formation with one-side welding, no oidation gas porocity slag inclusions in welds, better pressure resistance, and 0.6Mpa bearable;
* no remains in the drum, discharge pipe is closed to the bottom of the drum, and no remaining liquid;
* male and female flange seal in drum mouth, polytetrafluoroethylene made gasket, liquid filler with stainless steel standard quick joint of automatic sealing (1/8", 1/4", 1/2" and 3/4") by international common use, and quick joint with protective cap on it, for the purpose of sealing and safety;
* drum body with electropolish, no active particle infiltrating containing material so that assures gloss inside and outside of drum and more convenient for cleaning, suitable for the storage and transportation of high purity liquid;
* corrosion resistance, non aging, non rusting, for long term storage and long distance trasportation, stable and solid, drum with 1.2mm-2.0mm thickness stainless steel plate pursuant to product type, collision resistance, recycling use for long time.
